SUMMARY

Detail-oriented Front-End Developer with 2 years of experience working with HTML/CSS, JavaScript, and React to deliver exceptional customer experiences. Adept at contributing to a highly collaborative work environment, finding solutions, and determining customer satisfaction. Passionate about learning new technologies, creating functional, user-friendly websites, and bringing products to life.

WORK EXPERIENCE

Front-End Developer

Cargo Fleet
February 2021 - current / Remote

- Utilized JavaScript, React, and CSS to maintain a balance between functionality and aesthetics
- Managed the global state using Redux for the web application
- Added Material UI components and increased productivity by 10%
- Created reusable components and routing to implement navigation between the components using React-Router
- Integrated RESTful services (REST API). Used JSON for data transfer between front end and back end
- Developed forms using Formik with Yup validation
- Worked with Jest to write basic unit tests
- Converted Class Components to Functional Components with React Hooks for better code readability
- Decreased the initial loading time of the application by 7% using the Lazy-Loading concept
- Debugged, optimized, and edited code using Chrome DevTools
- Modified existing legacy code to fix errors, improve performance, and utilize Search Engine Optimization (SEO) techniques
- Built user-friendly, accessible, and responsive interfaces with a mobile-first design
- Performed cross-browser compatibility testing on Browserling
- Participated in code reviews with a development team
- Worked with other departments to collaborate on new designs and features
- Attended meetings to keep track of the project status and issues
